

The Hidden Doctrine of Medical Testing

How Caribbean schools weaponize exams
and perpetuate hierarchy.

AUTHOR: Dr. Melvin Sewell, M.Sc., Ph.D.

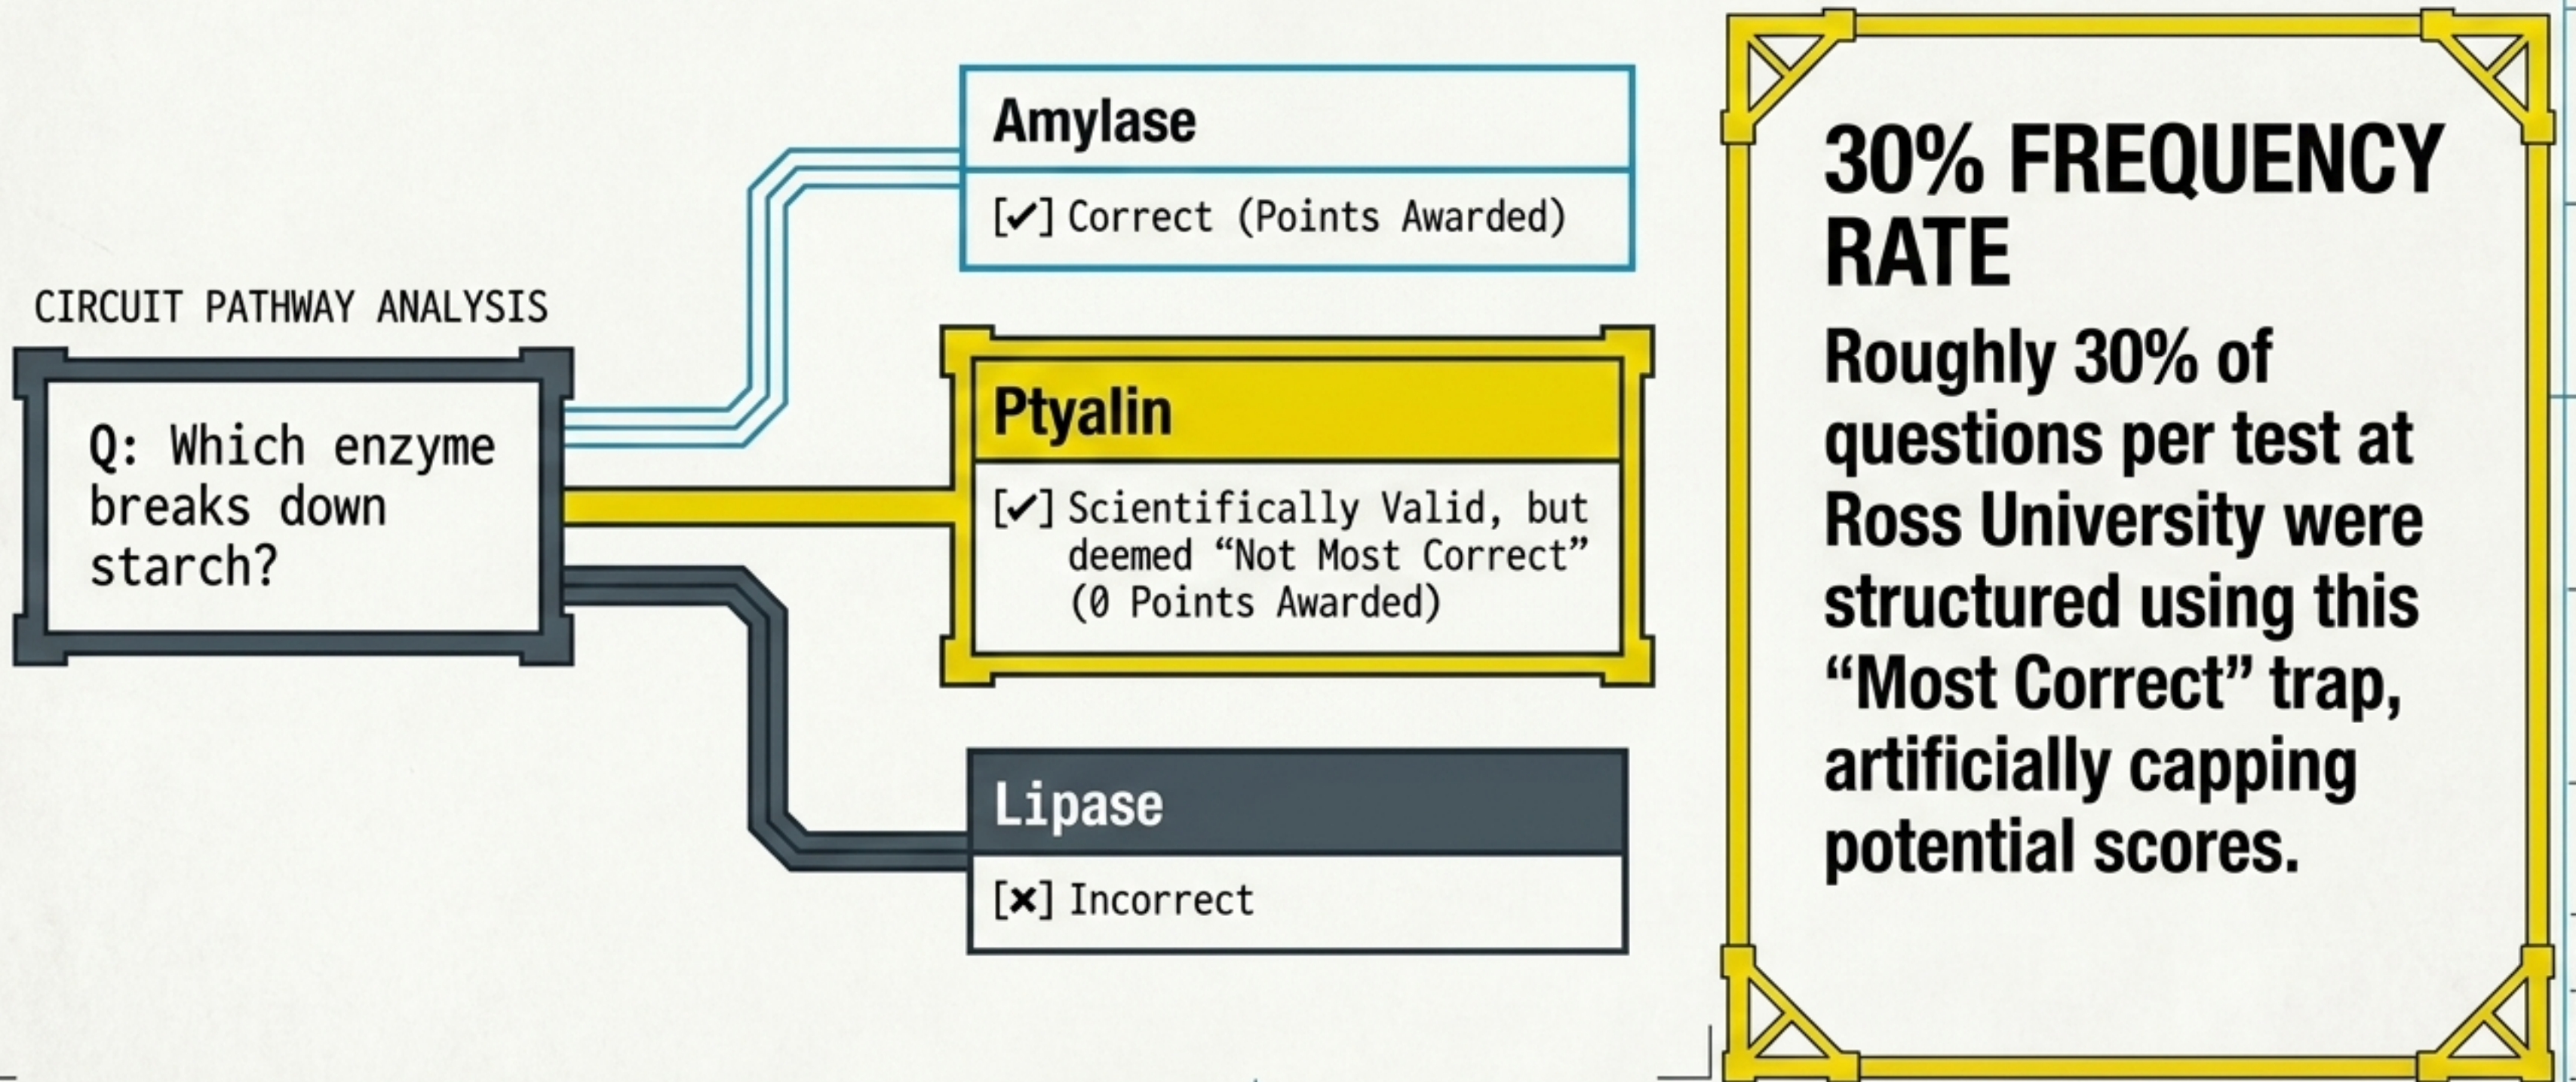

ORIGIN: ビベビベビベ™ Magazine

CLASSIFICATION: Cinematic Indictment & Systemic Diagnostic

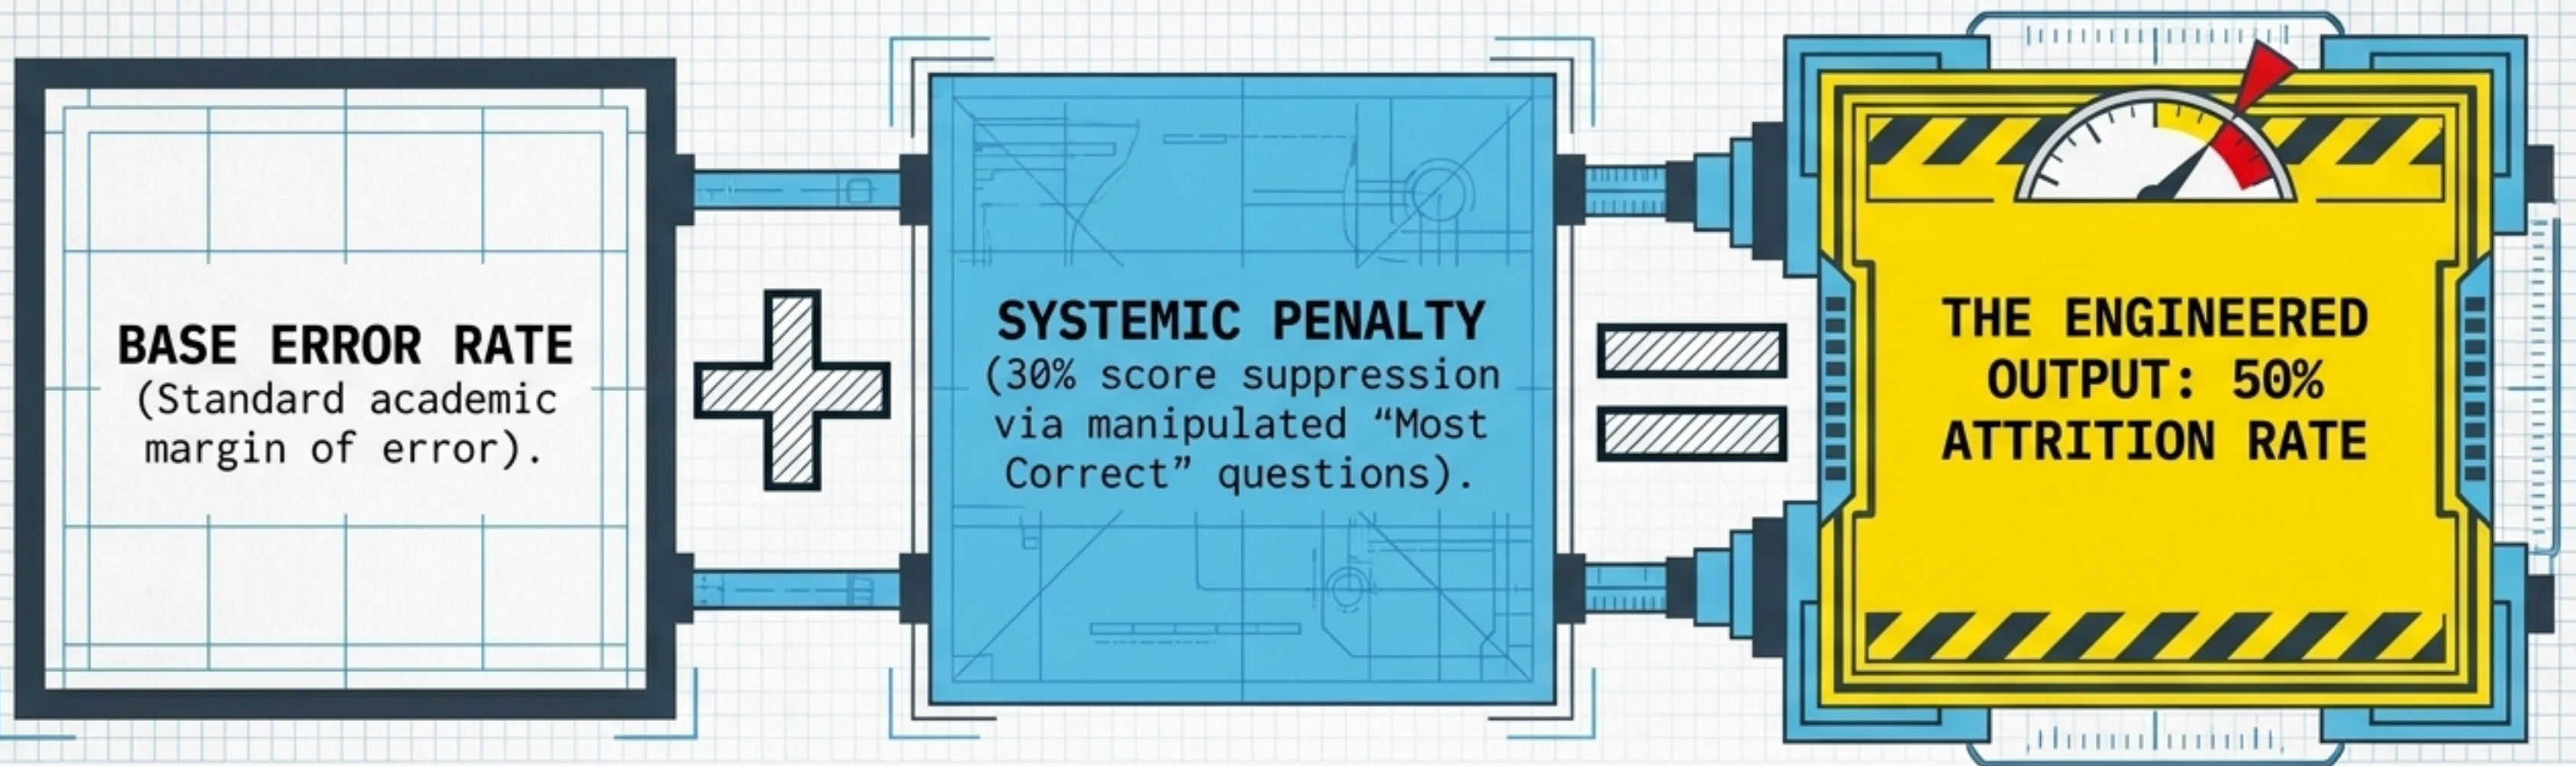

An educational system is functioning exactly as engineered. High attrition is not a byproduct of academic rigor; it is the deliberate output of a manipulated architecture.

THE ANATOMY OF A RIGGED QUESTION

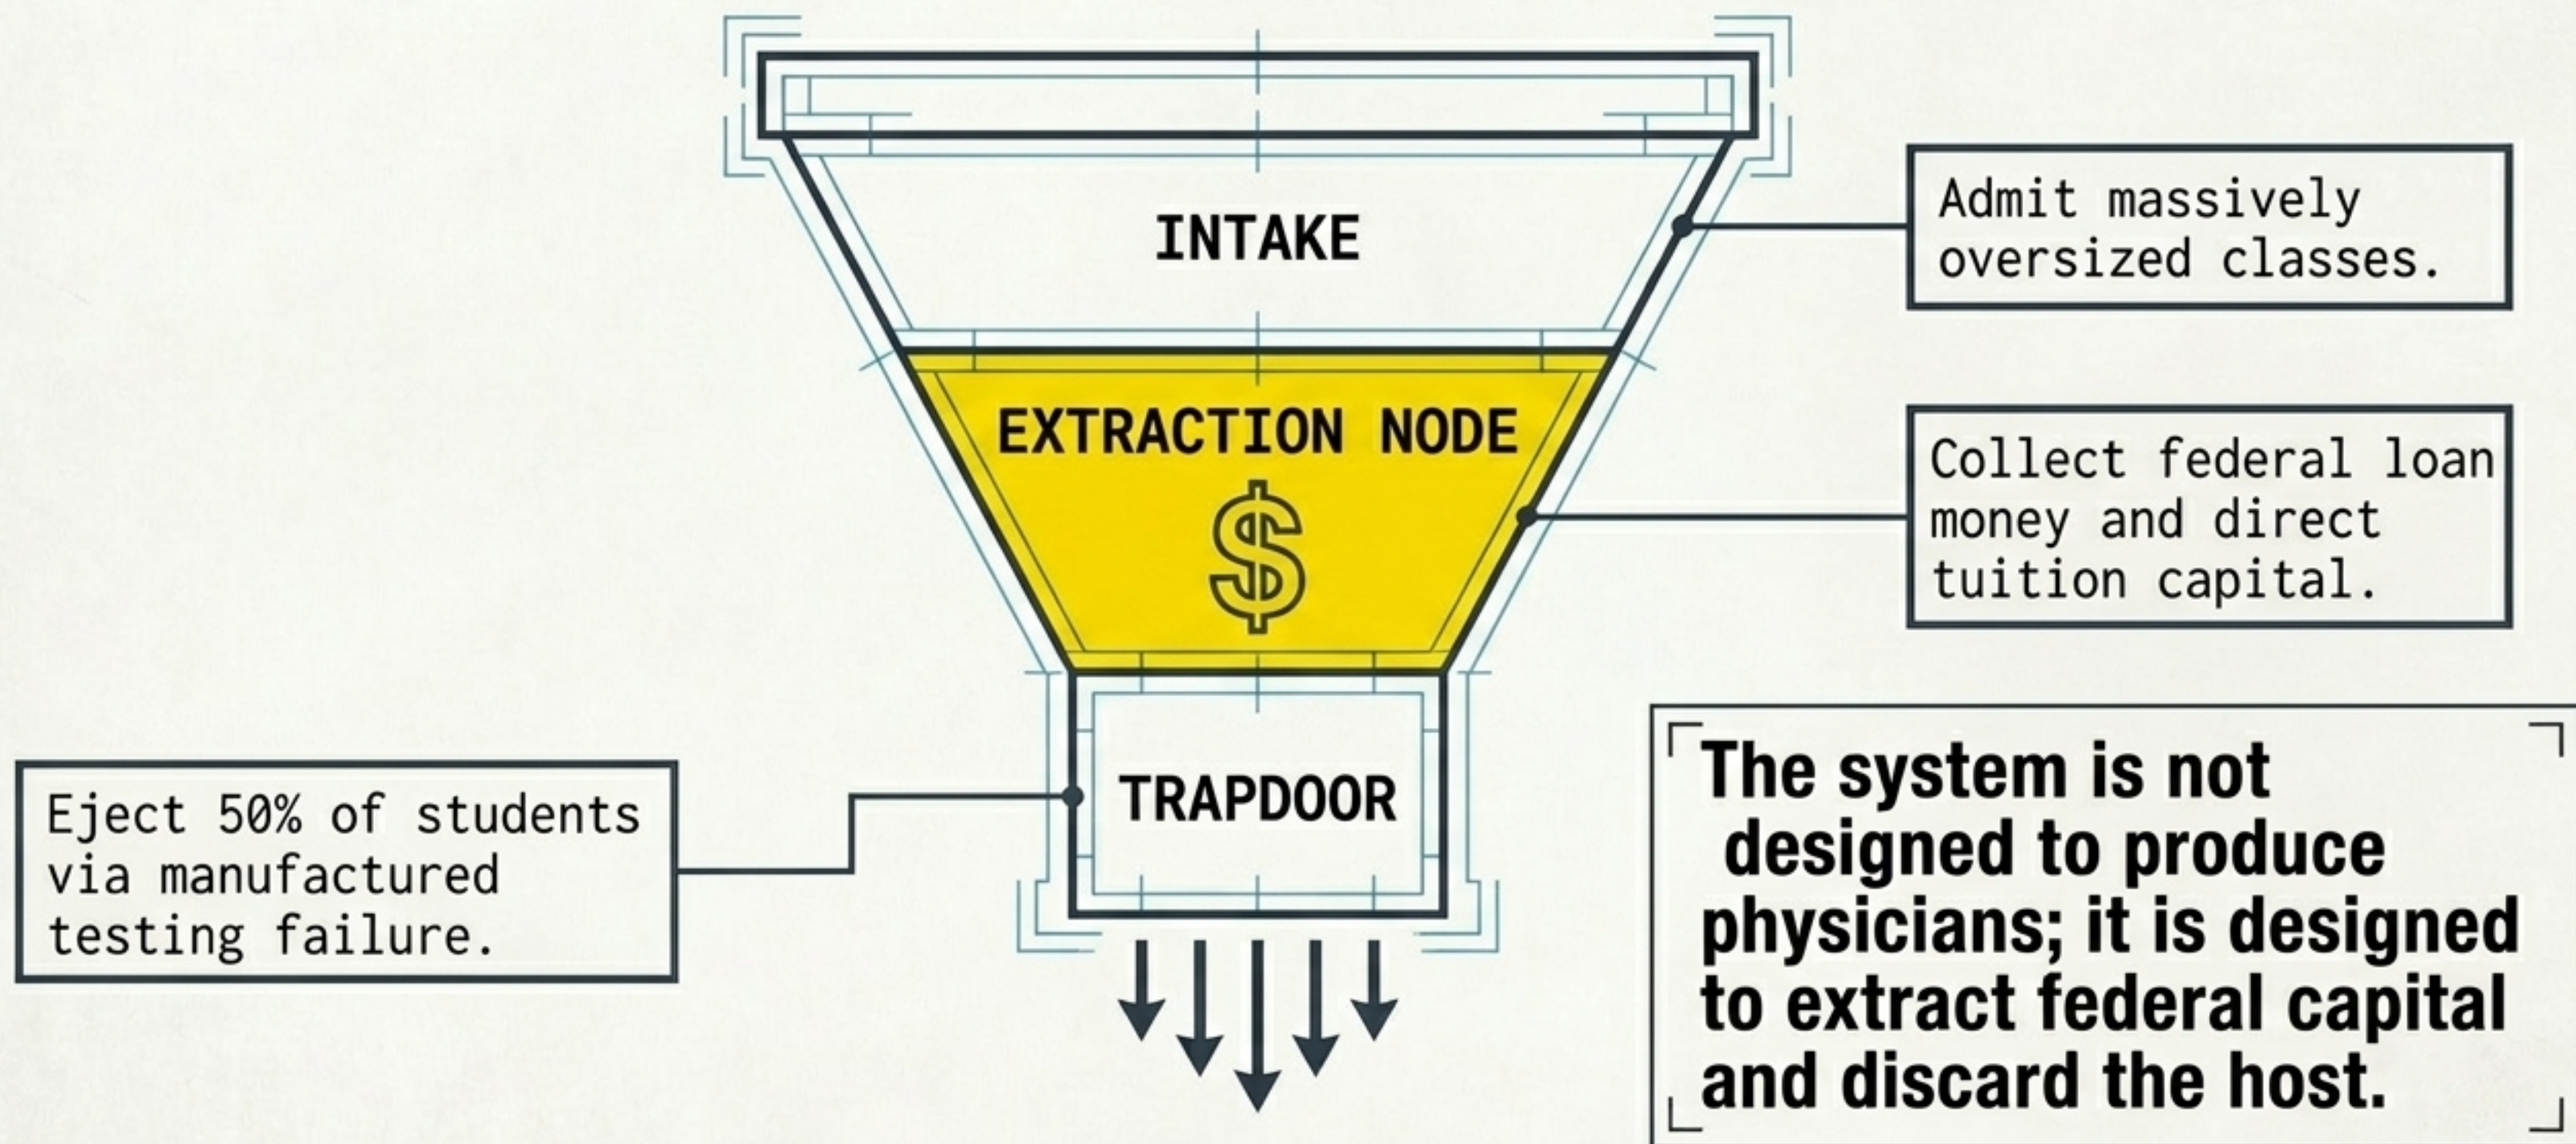

THE MANUFACTURED FAILURE EQUATION

By invalidating scientifically sound answers under the subjective guise of the 'most correct' doctrine, the institution ensures that half of all incoming students are mathematically destined to fail.

ENGINEERED ATTRITION FUNNEL

THE TIMELINE OF EROSION

2010

Reports emerge of severe overcrowding and delayed clinical placements.

A decade of documented institutional failure, sustained rather than corrected by the federal oversight apparatus.

2015

The 50% standard established; high attrition rates definitively documented.

2017

Formal investigations launched into deceptive practices by parent company Adtalem.

2020

Systemic breaking point; Borrower Defense claims filed for mass loan forgiveness.

THE IDEOLOGICAL SUBSTRATE

Ross University

Faculty ties to eugenics organizations.

Questions arise regarding the school operating as a platform for racial hierarchies.

Pepperdine University PhD Program

Academic prestige cloaking racial ideology.

A professor openly declaring opposition to interracial relationships.

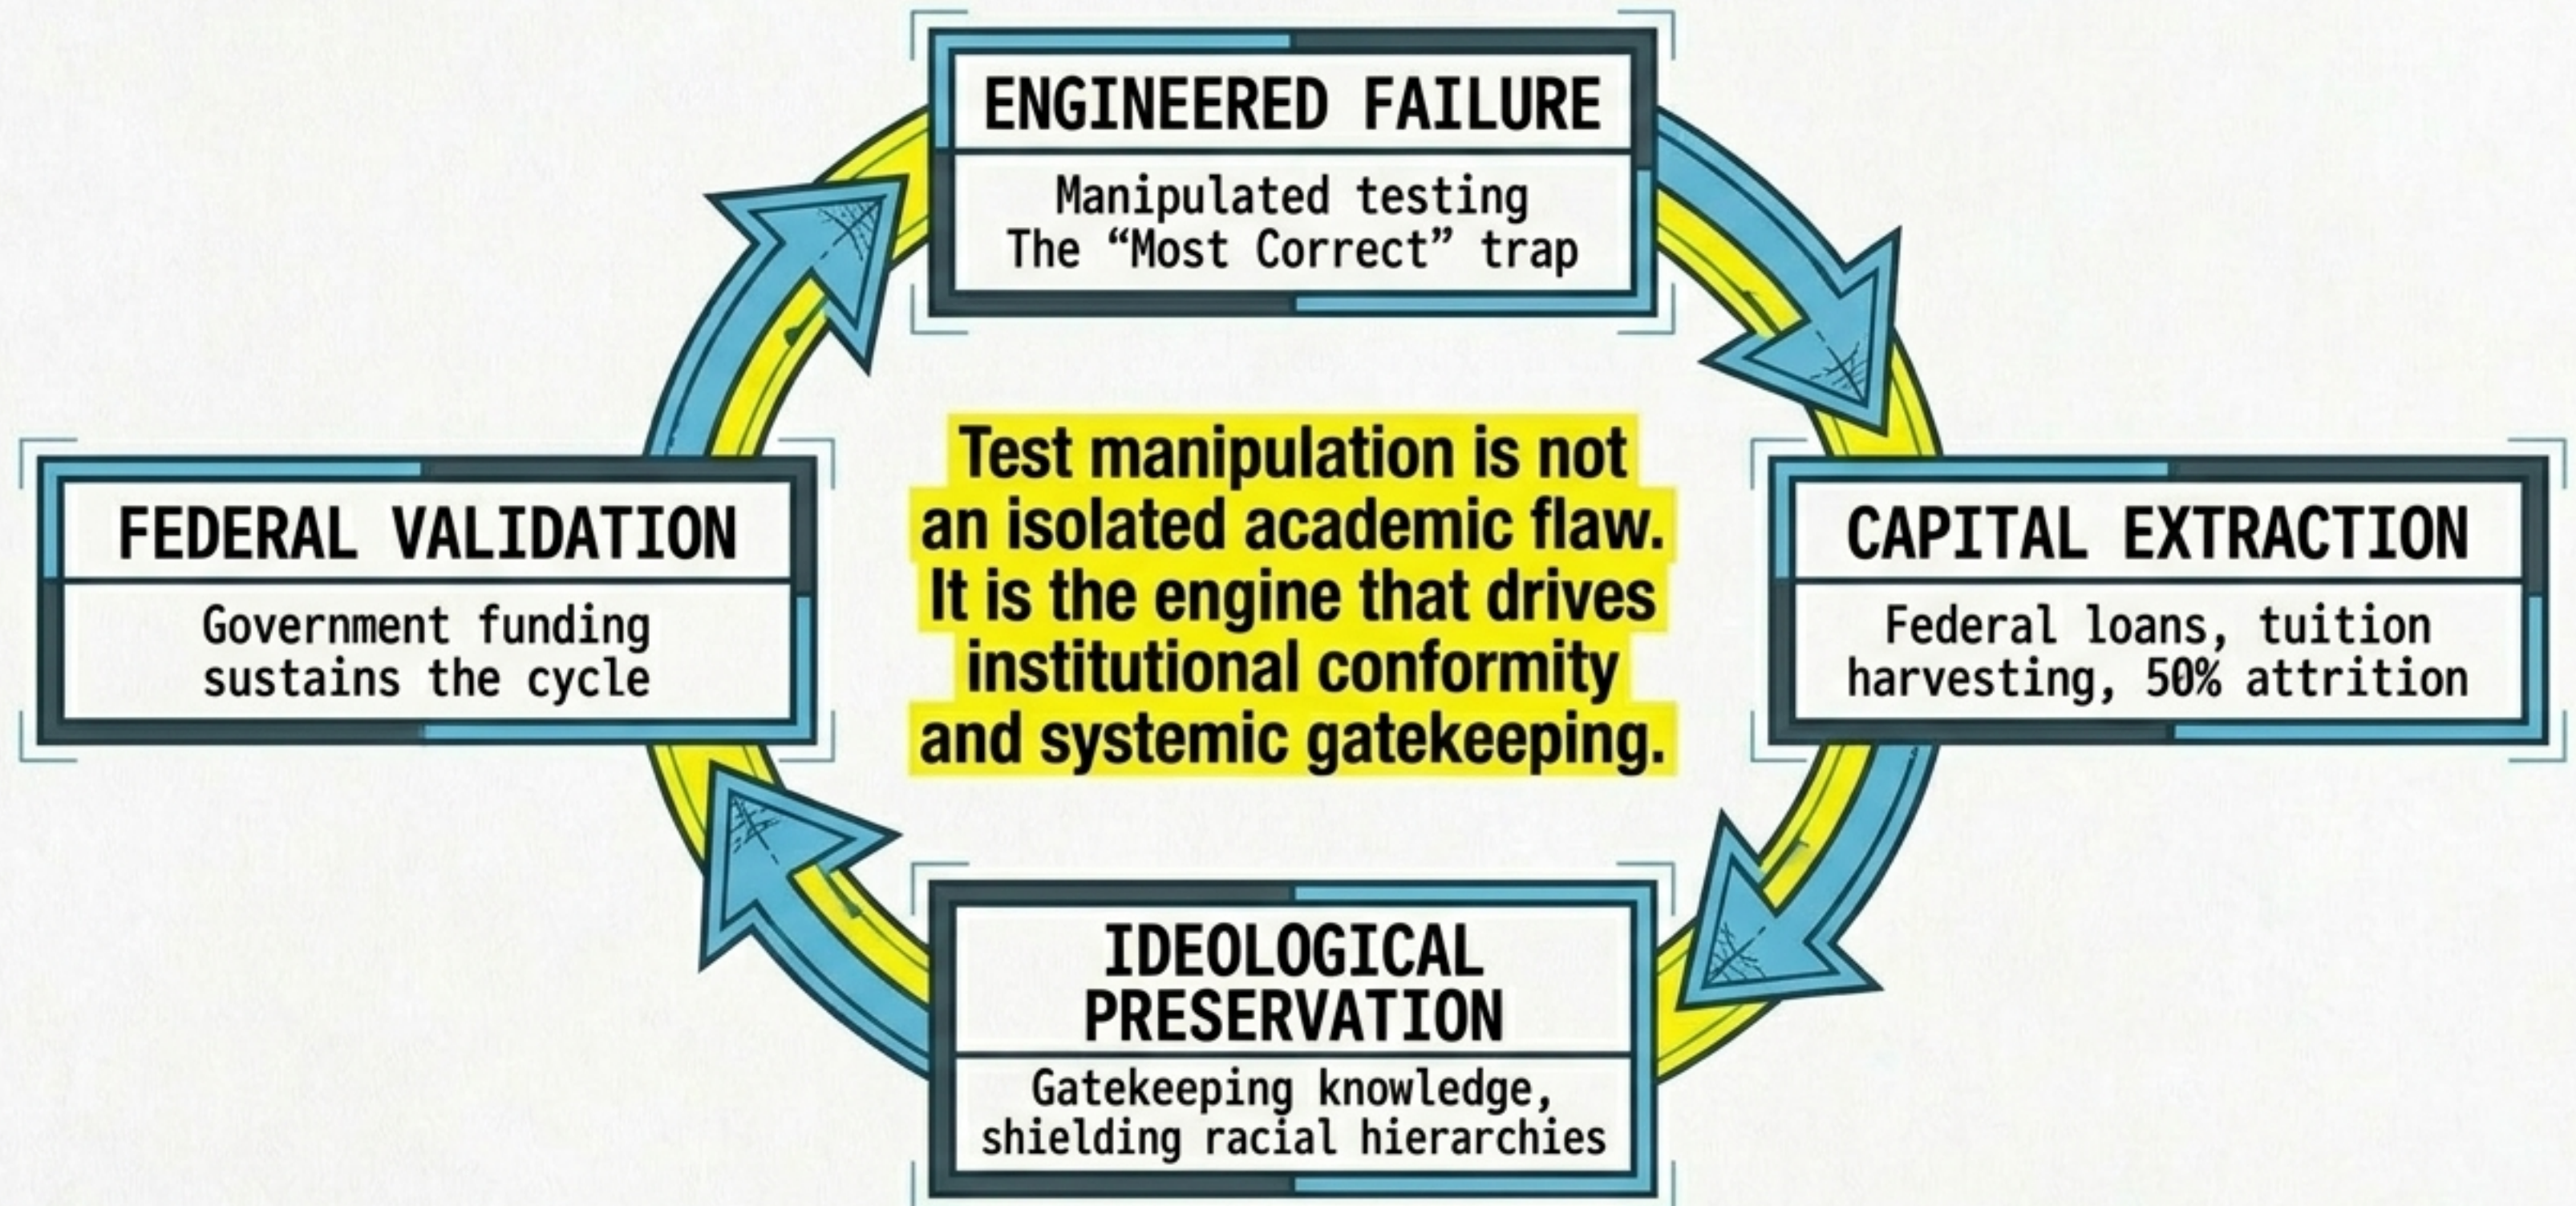

The persistence of discriminatory ideologies is not a glitch in fringe schools; it thrives equally within elite institutions under the protection of academic prestige.

THE ECOSYSTEM DOUBLE STANDARD

Established Institutions (Ross, Pepperdine)	Independent Innovators (e.g., VT Biosensor/Dr. Sewell)
Elite Prestige & Mass Scale	Independent Merit & Originality
Documented biases & eugenics ties	Neutral, purely scientific focus
Uninterrupted, billion-dollar pipelines	Denied
Sustained despite accountability failures	Rejected
Enforce Conformity	Drive Innovation

Funding decisions do not prioritize merit. They favor conformity, ensuring established institutions maintain control over who defines knowledge.

THE CYCLE OF SYSTEMIC CONTAINMENT

“Education must measure understanding — not obedience.”

Until these hidden doctrines are exposed, the current infrastructure will continue to funnel students into systems where failure is engineered, innovation is starved, and success is racialized.

END DIAGNOSTIC.
